

**Material** S275JR  
B500SD  
No additional protection  
Priming

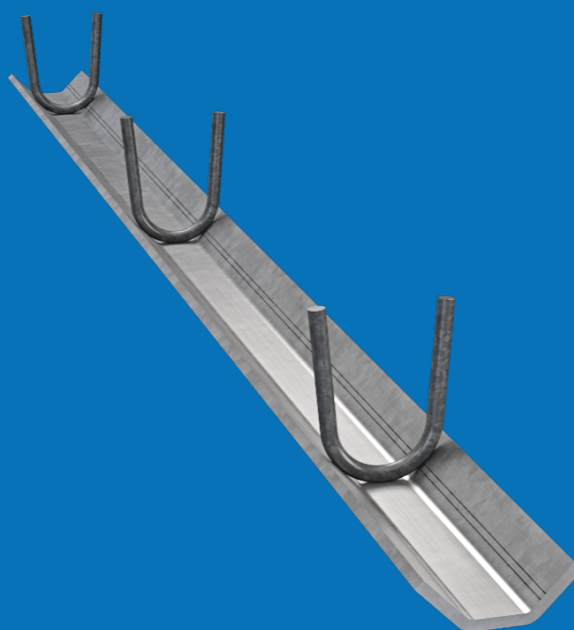

**Surface treatment** Electroplated zinc coating  
Hot-dip galvanized  
Stain-less steel

\*Possibility of manufacturing in different lengths

PROXI protectors are designed for saving the corners of columns, walls or panels from an impact.

Its main use is in installations where fork-lifts or pallet trucks can cause impacts on the structural elements.

# Corner protector PROXI

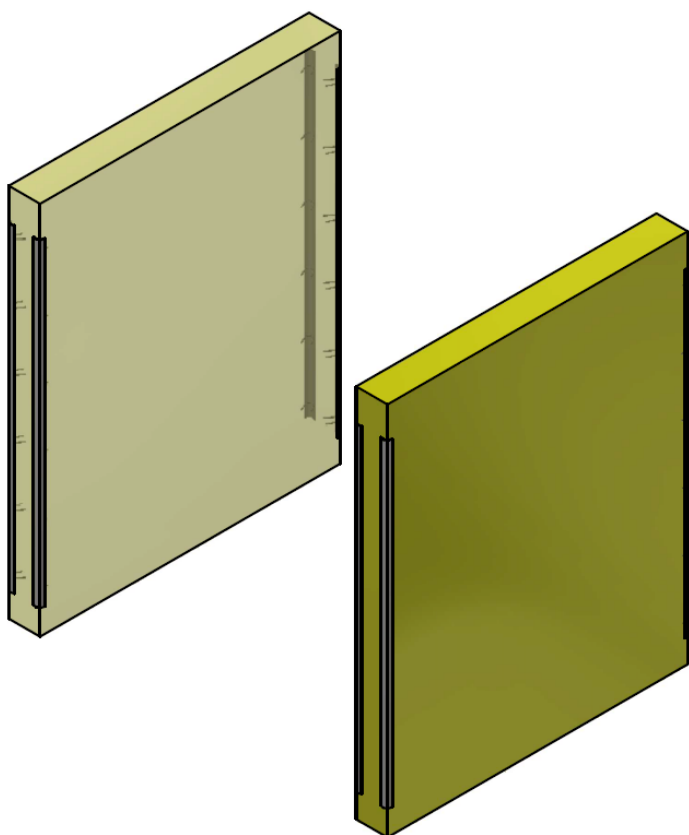

[www.noxifer.com](http://www.noxifer.com)

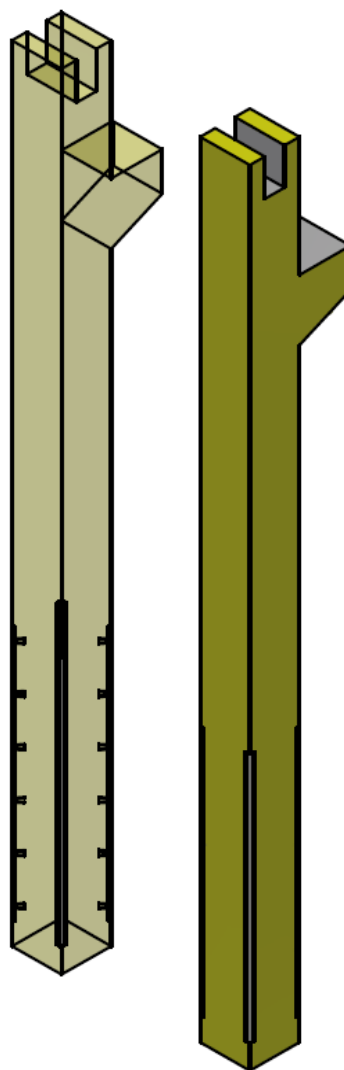

Application examples of the corner protector.

## Protection of the panel's corner

## Protection of the column's corner

Once the support is poured, check that the protector is aligned with the corner's support and it does not present any imperfection caused during the assemblage phase.
